

Established on April 25, 2019. Certified in October 2023 as AISol Startup # 3.

## Modular type fully automated continuous production equipment high-mix low-volume production for pharmaceuticals and functional chemicals

- # CO<sub>2</sub> emissions reduction due to energy savings
- # Cost reduction through waste loss reduction
- # FDA supports continuous manufacturing.

- The world's first fully automated continuous production including solid-liquid handling on actual equipment scale.
- Modularization of unit operations (reaction, extraction, crystallization, filtration, drying, dispensing, etc.) required for chemical production.
- Engage in joint research project with AIST Group to verify fully automated continuous production installations.

As of September 2024
