

Established on November 2016, Certified in May 2024 as AISol Startup #4

**With the original generative AI (LLM),
supporting manufacturing industry application exploration/customer value creation.**

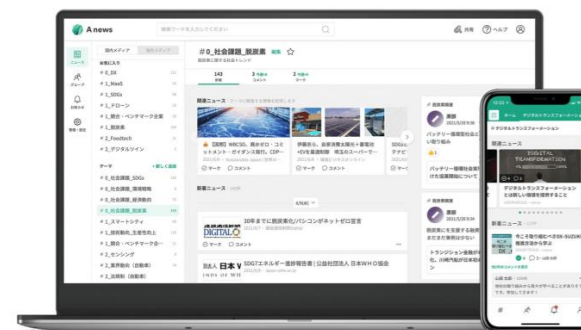

Key technology : Crawling / Data structuring / Document generation

Main services : Anews /Astrategy / Stockmark A Technology

The labor costs for text work are 13 trillion yen annually, of white-collar workers in enterprises of manufacturing industries. This is one of the big social issues.

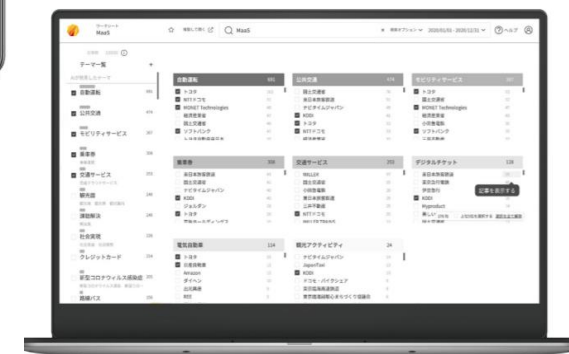

Our company provide original generative AI (LLM). With our GenAI, we are going to transform business model of manufacturing industry firstly and all industries in the near future.

we collaborate with the AIST Group to improve the accuracy of LLM by sharing research and computer resources.
